SKILLS

HTML5, CSS3, JavaScript, jQuery, Express.js, React.js, Node.js, progressive web apps, agile methodology, computer science, database theory, MongoDB, MySQL, and Git.

Summary

My name is Alex Purfield and I am interested in pursuing a career as a Junior Web Developer. My background has primarily been in people-facing positions such as sales and customer support however technology and software has always been the great equalizer across my experiences. I am a recent graduate of the DU Full-Stack Coding Bootcamp where I honed my problem-solving skills and officially caught what my instructor called, "the coding bug". I enjoy the meticulous process of debugging and the satisfaction of overcoming the challenges and want to continue expanding my knowledge in the coding world.
